

Rights of Way Report 11th July 2022

ROW project: Maps have been supplied to Mary who I believe has two volunteers to organise their distribution to willing walkers. The maps are based on Ordnance Survey underlays and are up to date. Personally I think the start/finish points are clear to anyone able to read a map so they shouldn't need further location information.

I am happy to deal with issues arising, either by talking to the landowner or DC. E-mail contact with me is preferable.

One issue that will probably be raised concerns a collapsing stile where footpath number 7 enters the north end of Icen Lane. I am not sure whether this is the responsibility of the landowner or DC, as it adjoins a highway and is only a few yards from the busy A35.

I have reported it to DC and am waiting to hear from them.
